

3. Emergency Kit

YOUR NEEDS & SUPPLIES

1. Determine the number of people and duration each kit will need to accommodate
2. Supply each kit for 3-7 day use
3. Determine type of kit needed (ie. shelter in place, vehicle evacuation, etc.)
4. Create a supply list based on household size, days of use, kit type, and number of kits
5. Acquire supplies piecemeal OR as prefabricated kits from a retailer

3. EMERGENCY KIT

ASSEMBLE & STORE

- Assemble kits in airtight bags and place in containers, totes, duffel bags, and backpacks

- Keep pets, babies, elderly and other special needs in mind when packing
- Create multiple kits for different forms of seasonal readiness (winter, flood, wildfire)

- Keep each kit in a high and dry location that the whole household knows

When To Update Your Kit?

1

Check kits every 6-12 months for storage damage or expired items

2

Adjust kits as disaster risks evolve and household changes

3

Update as new technology advances

4

Place duplicate back-up kits in different locations
